

ICEA Approved Cultural Competency Contact Hours

Cultural Competency training requirement

The ICEA Board of Directors has made the decision that 4 hours of the 24 hours required for recertification need to be in an area of Cultural Competency, Cultural Awareness, Diverse Cultural Practices and/or the like. This decision was made in order to ensure that our educators and doulas have a greater understanding of the diverse perinatal practices that are intertwined in the communities around us, and a deeper knowledge of the areas of improvement that are needed in our healthcare systems. Four hours is a very minimal requirement but will provide an opportunity to begin exploring how we can all do a better job teaching and serving families.

Below is a list of courses and trainings that have been recommended as possible ways to meet the requirement. This list will continue to grow as other options become available. You will need to do the research to decide which course, training, or other activity will work best for you.

- Dignity in Pregnancy and Childbirth online training

Cultural Enrichment Activities and Historic and Diverse Birthing Practices CE options

Each activity/option counts for 2 CE hours. Only 4 hours total (so 2 of these activities) of these Cultural Awareness activities per recertification cycle is accepted.

Birth in Belfast (46.40mins)

[Find Link Here](#)

Follow up questions:

–Summarize the content. Discuss the similarities and differences in Belfast vs where you are from. How does or how do you see a childbirth educator or doula impacting this birthing culture. Response should be 2 to 3 paragraphs in length.

Birth in Nepal (23min 41 sec)

[Find Link Here](#)

Follow up questions:

- How do you see childbirth education and/or birth support playing a role in the births in this video?
- What are the advantages vs disadvantages of having a baby at the health posts vs at home in the village?
- What is the Nepalese government doing to improve birth outcomes?
- What are the women’s fears during pregnancy, birth, or during the postpartum time?

Saving Nepal’s Mothers by 101 East (25 mins)

[Find Link Here](#)

Follow up questions:

- How do you see childbirth education and/or birth support playing a role in the births in this video?
- What are the advantages vs disadvantages of having a baby at the health posts vs at home in the village?
- What is the Nepalese government doing to improve birth outcomes?
- What are the women’s fears during pregnancy, birth, or during the postpartum time?

Birth in Guatemala

[Find Link Here](#)

This is about training indigenous midwives in villages so that better care can be accessed by the remote villages. Also, there is a more collaborative care model now between the standardization of the training of traditional midwives and the link between them and the medical staff.

Follow up questions:

- How would you define the circle of care here?
- What has been improved upon?

–What is currently being worked on to improve birth outcomes, and what still needs to happen?

–Compare and contrast this to birthing in the US.

Birthing in the Amazon

[Find Link Here](#)

Discuss barriers to care, the importance of traditional midwives, and how they learned and trained. Compare and Contrast birthing in the Amazon vs another country.

Motherland: Birthing in the Philippines (1 Hour 34min)

Read this and summarize in your own words. Make an Instagram infographic and link to ICEA.

If you take a course or training that does not offer CE's, we ask that you submit the time spent attending or viewing the event and then give us a brief synopsis of what you learned (3/4 to 1 page) and if you recommend this educational event. If you would like to earn additional CE's you may choose to submit what you learned in blog format to be

published on our blog page. This is subject to requirements for submission. Please contact info@icea.org for more information.

An alternate activity would be to read a book on Culturally Diverse Birthing Practices, Historical Birthing Practices, or Disparities in Healthcare and submit the time spent reading along with a synopsis. Similarly, you could attend a community event or work event and submit the same information. We will allow for partial hours in several activities that equal up to 4 CE's.

It is strongly recommended that you pick an activity outside of the approved list that you submit for approval prior to attending so that you know the CE's are approved. Simply send the details of the event or activity to info@icea.org.

These hours will not be subject to the occasional transfer fee that applies to other outside CE's
